Choosing Materials

When choosing a material to do a certain job we need to think about the properties that it needs.

For each of the following name a suitable material and state the properties it has that makes it suitable. * You should give at least two important properties*

Object	material	Properties
Cushion 		
Handle of a saucepan 		
Light Switch 		
Sole of a shoe 		
Car engine 		
Washing powder box 		
Packaging for storing tablets for a headache
