

Groups of Animals

Question 1 Page 1

Name		School	
Class		Date	

Study the following pairs of animals.

Remember that the similarities and differences must be related to their group or structure and not where each animal lives or what it feeds on.

An example has been completed for you.

PAIRS OF ANIMALS
amphibian and reptile
bird and bat
killer whale and shark
snake and eel
millipede and centipede
octopus and jellyfish
slug and worm
duck and frog
penguin and seal

PAIR OF ANIMALS	SIMILARITY	DIFFERENCE
example spider and insect	they are both arthropods	the spider has eight legs the insect has six legs
amphibian and reptile
